Unified Trading Platform

Access crypto and forex within the same dashboard. Enjoy real-time charts, smart order types, and one-click conversions between USD, crypto bits, and fiat pairs.

Secure & Regulated

We partner with licensed forex brokers and regulated crypto exchanges, ensuring transparency, audit-grade reserves, and bank-grade security for all transactions.

What is Crypto Trading?

Crypto trading is the act of **buying, selling, or exchanging cryptocurrencies**—like Bitcoin (BTC), Ethereum (ETH), and others—with the goal of making a profit. It works similarly to stock or forex trading, but instead of traditional currencies or company shares, you trade **digital assets** on **cryptocurrency exchanges**.

How Crypto Trading Works

Buy Low, Sell High:

You purchase a cryptocurrency at a low price and sell it when the price goes up.

Trade Pairs:

You trade one cryptocurrency for another (e.g., BTC/ETH), or against fiat currency (e.g., BTC/USD, ETH/INR).

Use Exchanges:

Platforms like Binance, Coinbase, WazirX, or Kraken allow users to trade 24/7 globally

What is Forex Trading?

Forex trading, or foreign exchange trading, is the process of buying and selling currencies to profit from changes in their exchange rates. It's the **largest financial market** in the world, with over **\$7 trillion** traded daily.

How Forex Trading Works

In forex, you always trade **currency pairs**—like **EUR/USD**, **USD/INR**, or **GBP/JPY**. You're betting that one currency will rise or fall in value against another.

Currency Pairs

Major (EUR/USD), Minor (EUR/GBP), Exotic (USD/INR)

Market Hours

24 hours a day, 5 days a week (Monday to Friday)
